

# Cultivating *Fucus vesiculosus* (Bladderwrack) in the Kiel Fjord - Lily Copping

- Masters thesis from CAU Kiel, in collaboration with CRM and GEOMAR
- Timeframe: April- October

## Aims:

1. Evaluating the recruitment/survival success of germlings on different substrate types
2. Evaluating the optimal time period to move germlings from hatchery (lab) to field (Kiel Bay)
3. Assessing the survival rate of frozen embryos → potential for aquaculture
