

# Combining applied phycology and aquaponics: From system design to interesting products

Presenter: Tobias Lipsewers (PhD)

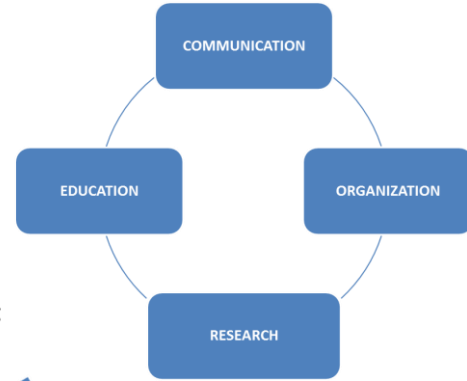

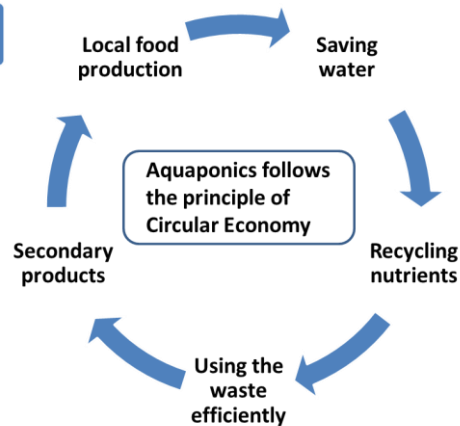

Affiliation: Finnish Aquaponics Society (FAPS)

## The basic principle of Aquaponics

What is so cool about **Aquaponics** & what can be produced with it?

**Circular Economy:**  
How does Aqua-ponics fit into this principle?

**4 CORE aspects:**  
How to clear the way for Aquaponics?

**Nordic Algaeponics:**

- Tailor-made system design
- What is possible?
- Promising species
- Cold-water species vs. heat from waste streams!
